

Sustainable Green Supply Chain Management & Procurement Policy

Mahindra EPC Irrigation Ltd United is committed to following responsible business practices by contributing to environmental protection and enhancing people's performance through green procurement & services while ensuring business growth for its supply chain.

Objective:

To enhance sustainability performance and minimize Environmental, Social & Financial risks within the MEIL supply chain, procurement & services.

Policy:

Green Supply Chain:

MEIL shall engage with the supply chain partners including suppliers, logistics & service providers to:

- Strengthen compliance with all relevant statutory provisions and conform to the MEIL Code of Conduct
- Identify & address business and ESG (Environmental, Social & Governance) risks.
- Develop management systems related to Sustainability, Quality, Environment, Safety, and Energy
- Monitor. Evaluate sustainability performance and Identify Improvement Opportunities
- Reduce environmental footprint by means of material, energy & water conservation
- Encourage Logistics optimization and waste reduction using 3R (Reduce, Recycle and Reuse)
- Move towards zero wood usage for parts packaging
- Promote a safe and healthy workplace for the employees
- Enhance bio-diversity within the facilities
- Promote sustainability awareness and assessments at the supply chain through IT-enabled processes
- Enhance sustainability within their own supply chain
- Encourage suppliers to develop and publish their own sustainability report
- Facilitate reward and recognition

Procurement:

- Comply with all relevant statutory provisions pertaining to procurement
- Establish sustainable performance indicators for equipment. Products & services
- Open Door framework for all the existing and potential suppliers by maintaining the highest level of ethical standards & transparency in dealing.
- Minimize the environmental, social and cost impact associated with the life cycle of goods & services
- Procurement of recycled/part-recycled products to optimize resource consumption
- Procure energy-efficient equipment by defining specifications in tender & contracts
- CO-create innovation to maximize value for both supplier and end-user

We shall promote sustainable practices with all our stakeholders.
